# The Prespa Lakes basin

# A global biodiversity hotspot

# The outset of transboundary cooperation

The screenshot shows the Ramsar Convention website. The header includes the Ramsar logo and the text "The Ramsar Convention on Wetlands". There are language options for English, Français, and Español. The navigation menu includes Home, About Ramsar, News, Activities, Publications, Documents, Media Galleries, and Address Book. A search bar is also present.

The main content area features a news article titled "Major Transboundary Park established in Southeastern Europe" dated 03/02/2000. The article is subtitled "Transboundary 'Prespa Park' created in innovative diplomacy". The text describes how Delmar Blasco, the Secretary General, celebrated World Wetlands Day on 2 February by participating in ceremonies near Prespa Lake. He noted that the heads of three of the Convention's Contracting Parties (Albania, Greece, and the Former Yugoslav Republic of Macedonia) declared their resolution to join forces across borders to establish a protected area. The purpose of the meeting was to declare the "Prespa Park" on World Wetlands Day, a new protected area including parts of all three countries.

In his speech, Mr Blasco said that he considered the present gathering probably the most significant of all the many World Wetlands Day celebrations around the world, because the heads of three of the Convention's Contracting Parties have come together to declare their resolution to join forces across the borders of their sovereign nations to establish a protected area that should provide great benefits for the local people and at the same time should contribute to conserving the biodiversity of the planet. He noted that this ceremony represented only the beginning of a process that will require political commitment, significant investment, and a lot of work in research, innovative development projects, and training. He congratulated the three governments warmly for their initiative.

Below the text is a photograph of the Prespa Lake region, showing a large body of water surrounded by green hills and a small settlement.

On the right side of the article, there is a "Follow us" section with social media icons for Twitter, Facebook, and YouTube. Below that is a "Ramsar Awards" section with a globe icon. Further down is a "The Convention today" section with the following statistics:

- Number of Contracting Parties: 168
- Sites designated for the List of Wetlands of International Importance: 2,186
- Total surface area of designated sites (hectares): 208,674,247

At the bottom of the article, there is a link to the Ramsar Secretariat.

*In this context, joint actions would be considered in order to:*

*... c) explore appropriate management methods for the sustainable use of the Prespa Lakes water;*

**Prespa Park Declaration, Feb. 2000**

# Prespa Park institutions

- 10- member Coordination Committee
- 3-member Secretariat (NGOs)
- 11 regular & 2 extraordinary meetings
- International community support

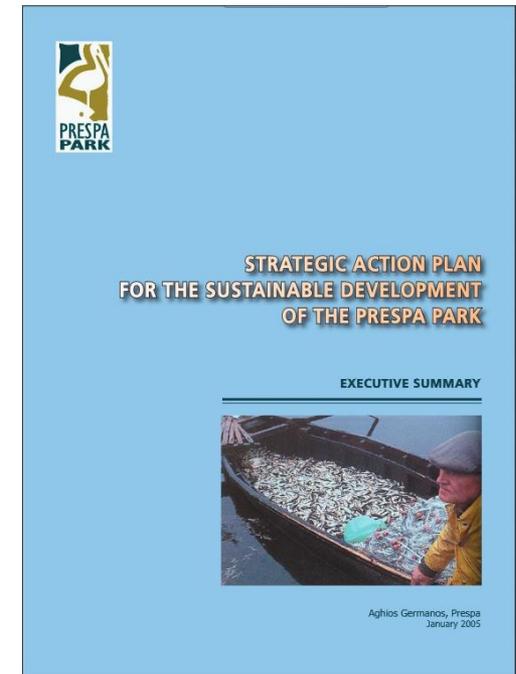

# Water cooperation in the spotlight

Intergovernmental water cooperation on the basis of WFD/ IWRM principles

## Prespa Park Strategic Action Plan

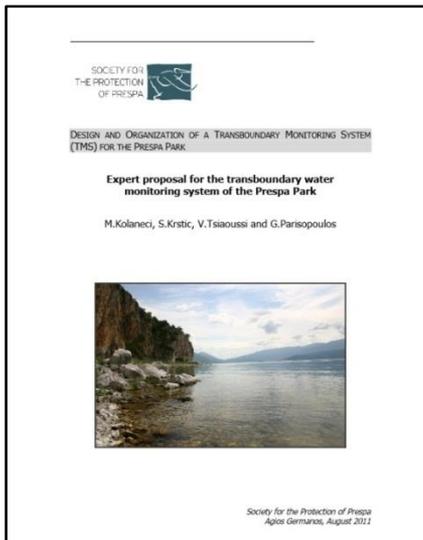

- ❑ Prespa lakes basin management plan
- ❑ Transboundary monitoring system

# Water cooperation milestones

- ❑ trilateral water authorities' meetings – water management working group
- ❑ consolidation of municipal cross-border cooperation
- ❑ setting up of NGO networks
- ❑ joint water-related studies
- ❑ transboundary water monitoring system scheme

Discrete national Prespa sub-basin management plans

# Inter-state cooperation upgrade
