

The 5th International Yellow River Forum on *Ensuring Water Right of the River's Demand and Healthy River Basin Maintenance*

Sponsored by Yellow River Conservancy Commission
& China Yellow River Foundation

Call for Papers (Extended to May 31, 2012)

The 5th International Yellow River Forum (IYRF) on *Ensuring Water Right of the River's Demand and Healthy River Basin Maintenance* will take place on September 24-28, 2012 in Zhengzhou, China. We sincerely invite you to contribute papers and participate in this event.

The IYRF Organizing Committee will hold the forum jointly with well-known institutions and organizations in worldwide water field, such as World Wide Fund for Nature, Global Water Partnership, International Network of Basin Organizations, International Commission on Large Dams, etc.

Welcome to join us and share your valuable experiences and ideas on river management! We appreciate if you distribute this information to your colleagues and relevant persons who are interested in this event.

Thematic Sessions

- Advanced river basin and water resources management with social and economic development
- Ensuring water right of the river's demand with strategy and measures of keeping healthy river
- Strict and efficient management of water resources in the river basin
- Adaptation and measures of water resources management in river basins due to global climate change
- Ecological protection and sustainable water utilization in river basins
- Structural and non-structural measures with new technology to ensure water right of the river's demand
- Water security, water transfer and advanced water saving technology and monitoring equipment

- Culture and civilization development in river harness history
- Sediment management of high silt-laden rivers and reservoirs
- Application of experiences and new technologies of water resources management
