

Integrated Water Resources Management *by and for basins*

3 major challenges to overcome worldwide

- **Climate change adaptation**
- **Biodiversity preservation**
- **Transboundary cooperation**

The International Network of Basin Organizations (INBO) is taking action to respond to these challenges by implementing **effective and sustainable solutions** at national and transboundary river basins levels:

Take action with INBO!

- Join events
- Support our advocacy and twinning initiatives
- Discover our projects
- Share and develop your knowledge

"For more than 30 years, INBO has been promoting management at national or transboundary basin level as an effective solution for reconciling economic and agricultural needs with the preservation of ecosystems, by involving all stakeholders and sharing data and issues. We are proud to support the creation and strengthening of basin organisations through the exchange of experience. Solutions do exist for efficient, joint and sustainable management of water resources, on a strategic basin scale. We're keen to share them!"

*Dr. Eric Tardieu,
INBO Secretary General*

 INBO Non-profit association under French law	 Over 192 Member-organisations	8 regional networks Africa - Asia - Central Asia - North America - Latin America - Brazil - Europe - Mediterranean region
 1994 Year of creation	 Over 88 Countries
