

Access to climate financing. Challenges, Opportunities and Solutions: *Perspectives from ACTO*

ACTO

Amazon Cooperation
Treaty Organization

Edith Paredes

Administrative Director ACTO

Belem Presidential Declaration

4th Presidential Meeting – August 2023

16 Themes (5 Planning)

29 Resolutions

113 Objectives

Atlas of Hydroclimatic Vulnerability (ACTO, 2021)

NIVELES DE VULNERABILIDAD Y SENSIBILIDAD

Color	Nivel	Valor
Red	Muy alta	5
Orange	Alta	4
Yellow	Media	3
Light Green	Baja	2
Dark Green	Muy Baja	1

Flood Vulnerability

- The occurrence of disasters reaches 50% in the Andean Amazon and even increases to 51% in the Brazilian Amazon.
- Affecting productive systems and livelihoods at different scales and different geographical areas (mainly floodplains and headwaters).

Poverty

Drought Vulnerability

- 19% of disasters in the Region are associated with drought, increasing this value to 46% in the Brazilian Amazon.
- The greatest impact of droughts in the Region is in the livestock sector with 58% and in crops and forests with 6%.
- The impact of droughts on the population is 36% of the total damage.

A temperature increase of 3 to 4 °C is expected towards the 21st century (2080-2100)

MODULO PUEBLOS INDIGENAS

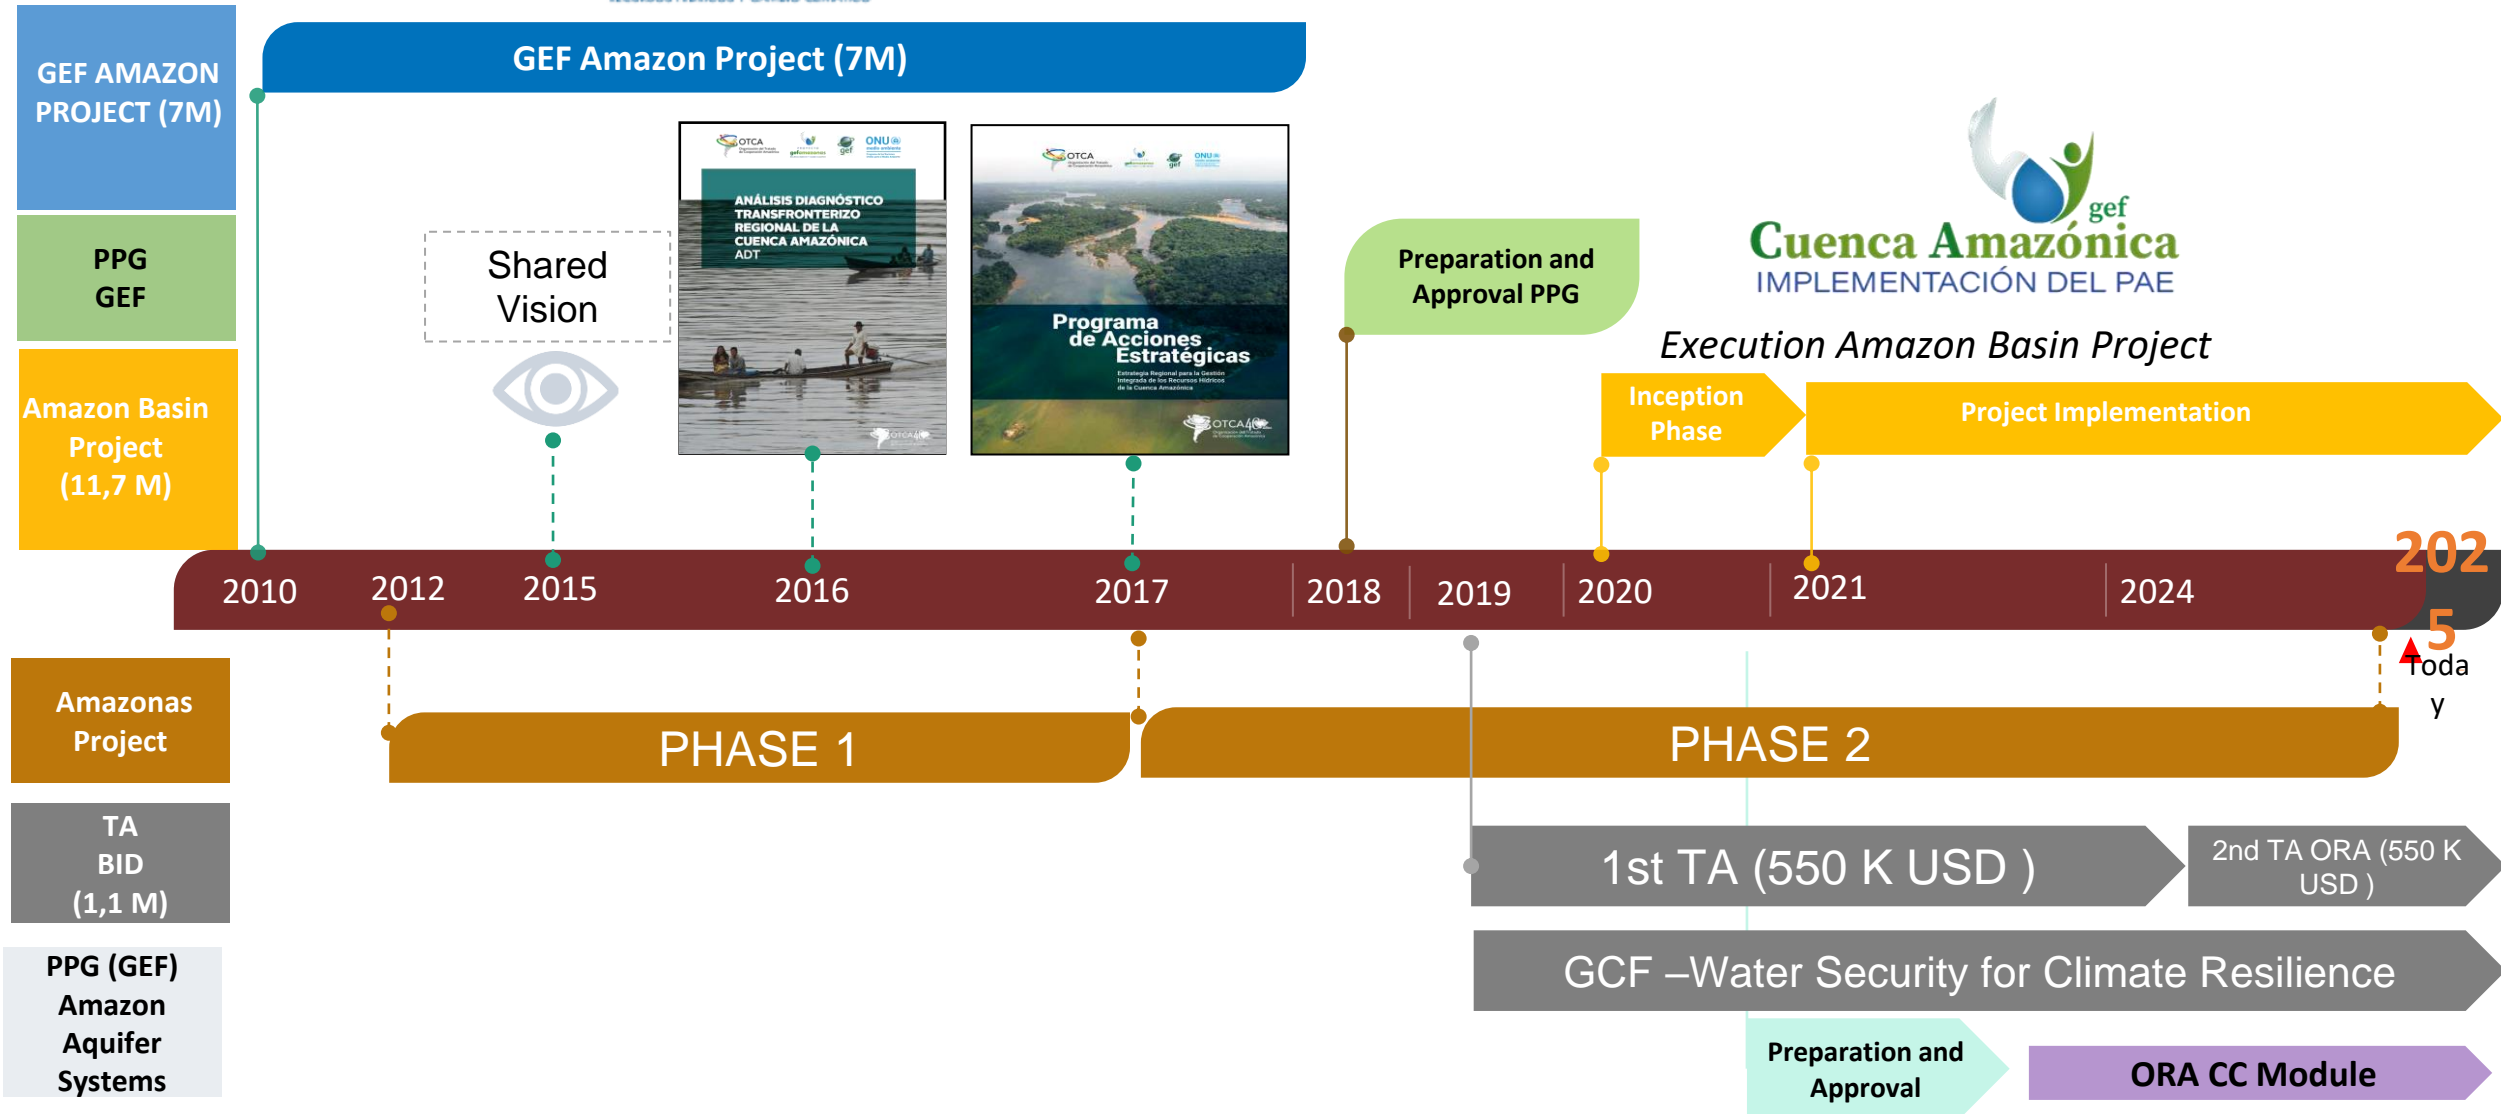

Pueblos amazónicos
Territorios
Etnias,
Conocimientos Tradicionales
y Lenguas

El módulo de Pueblos Indígenas de ORA recopila información y noticias sobre las comunidades indígenas amazónicas y tiene como objetivo ayudar a los países miembros de la OTCA (Organización del Tratado de Cooperación Amazónica) a monitorear la situación en la Selva y las condiciones de sus pueblos

Information on local knowledge related to adaptation to
Climate Change
(in preparation)
